

Foliars+ 555 Program

APPLICATION RATES:

Trilogy 1-5-5
5oz/1000

Protein Plus 14-2-5
5oz/1000

CalVantage 6-0-0 8Ca
5oz/1000

Applied every 2 weeks - this is a simple (1 case of each on greens) and cost effective program that has proven results. Add 3-5 oz/1000 of BioVantage when temperatures consistently reach 75°F.

This application gives roughly 0.1 lbs. of N along with ample amounts of P, K, and Ca. The 555 program includes a host of micronutrients and all of the carbon cofactors needed to stimulate microbial populations, which helps with the mobility of these nutrients and ones tied up in the soil. Based on soil tests, substitutions or additions with other **EarthWorks Foliars+ Liquids** can also be used to achieve great results.

"I use the 555 program exactly as it's written, those three products at those rates every two weeks. It really doesn't seem to matter what the weather is, dry, wet, hot, my greens stay consistent. A lot of people come in here and compliment my greens, I have to tell them, it's EarthWorks."

~Bob Patrick, Avalon G&CC Squaw Creek Course

Bob starts using the 555 program in the first half of April and continues through October. It's really that simple, he gets consistency, he can push the greens for tournaments, and gets roots out of the bottom of the cup cutter.... that's #BiologicalSoilMgmt

Cost Effective, Easy to Use, Proven Results.
