

Carbon Based Fertility Lawn Care Program

Build Better Lawns with Biological Soil Management

Built around three core products and one proven system, this biology-first approach helps create healthier turf, stronger roots, and more resilient soils. Trusted by lawn care professionals, it's designed to improve establishment, increase turf density, and reduce stress while supporting long-term soil health and performance.

Build Density & Color

Ideal For: Existing lawns, Thin turf, Summer stress recovery

Expected Results

- Improved density
- Better color
- Increased rooting
- Greater stress tolerance

Program Products

- Replenish 8-2-2
- Sea3

Seed Success Program

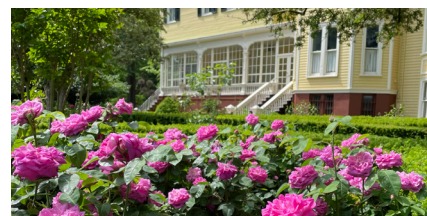

Ideal For: Renovations, Overseeding, New lawns

Expected Results

- Faster germination
- Improved establishment
- Better root development
- More resilient young turf

Program Products

- MycoReplenish 3-3-3
- Replenish 8-2-2
- Sea3

Landscape & Ornamentals

Ideal For: Trees, Shrubs, Perennials, Annual flower beds

Expected Results

- More blooms
- Stronger root systems
- Improved plant vigor
- Better stress recovery

Program Products

- MycoReplenish 3-3-3
- Sea3

Application Rates for Replenish 8-2-2 & MycoReplenish 3-3-3 - 5 to 10 lb/1000 sq. ft.
Application Rates for Sea3 - Lawns: 3 to 9 oz/1000 sq. ft., Landscape: 1 to 5 oz/gal
Fix compacted wear areas with RenovatePlus
